

Displaying Settings Menu for a Specific Application

The following code snippet will show you how to launch the settings menu for a given app. All you have to do is to modify code line 3 in Code snippet 1, replacing "sw6.programExample" with the package name of your app.

Code snippet 1

```
Intent intent = new Intent();  
intent.setClassName("sw6.admin", "sw6.admin.MainActivity");  
intent.putExtra("packageName", "sw6.programExample");  
/* Ændre sw6.programExample til pakke navnet for den app, hvis  
instillinger du gerne vil have frem */  
startActivity(intent);
```
